

NOAA/VIIRS/BLENDED NDVI composite for the week ending on 29th July 2018 over Agricultural regions of India

Difference in NOAA/VIIRS/BLENDED NDVI between 22nd July and 29th July 2018

- Agriculture vigour is moderate over many parts of North eastern states & Sub-Himalayan West Bengal; few places over North Coastal Andhra Pradesh, Bihar, Punjab and Haryana, Uttarakhand & adjoining Uttar Pradesh, Jammu & Kashmir & Himachal Pradesh and isolated places over Tamilnadu & adjoining Rayalaseema, Eastern Jharkhand, Gangetic West Bengal, East Rajasthan, West Madhya Pradesh, Maharashtra & Telangana and adjoining North Interior Karnataka. Due to persistent cloud cover, NDVI over crop cover could not be derived in remaining parts of Indian region.

- Good agricultural vigour was noticed in few parts of Punjab, Haryana, Jammu & Kashmir, Himachal Pradesh & Uttarakhand, isolated over Marathwada and adjoining Vidarbha, Telangana, East Rajasthan, Uttar Pradesh, Karnataka, North Coastal Andhra Pradesh, West Madhya Pradesh and Tamilnadu.
